

PHYSICS ROUND CAMPUS RELAY RACE (3 JUNE 1981)

RESULTS

Once again a new record for the three mile course - this time by the Economics students. Their time was 13.21 compared with the previous record of 13.44 held by the Geography Department. A very impressive team also from Economics set a new ladies record of 21.08, even though they ran further than anyone else! Special mention for the Physics' men and women student teams some of whom walked straight from paper 8 of finals to the start line.
