Those of us putting the flags out during the morning noticed that the ground was rather wet.... that made the "going" very poor and one of us decided to wear spikes for the first time in ten years. This deep insight was fully born out by the sluggish times recorded by most teams. We were somewhat disappointed by the smaller turn out this year compared with 1992 but were in turn pleased by the competitive racing which took place. Positions were continually changing during the whole race.....(what happened to engineering after their magnificent sprint round the cricket field in first place?) and the result was not decided until the final stretch. We hope that our visitors from Reebok enjoyed the event and trust they will return next year.

Thanks to our new starter Tony Guenault who proved to be a dab hand with a whistle and then kindly stayed to help Rob Henderson with the timing and recording. Thanks also to Bob, Tony and David who looked after our safety at the road crossings and everone else who helped on the day.

See you all next year.
